RECEIVED

UNITED STATES DEPARTMENT OF AGRICULTURE  
Agricultural Stabilization and Conservation Service

-FOREWORD-

*This report presents in narrative and statistical form the accomplishments of the Michigan Agricultural Stabilization and Conservation Committees in administering farm programs of the United States Department of Agriculture.*

*In its activities, the agency's primary responsibilities are to promote the national welfare and to carry out the legislative intent of the Congress. They include the improvement of the economic stability of agriculture, the maintenance of an even flow of quality products to market at reasonable prices and the improvement and protection of our soil and water resources.*

*We hope that this report will be useful to the many persons and organizations who are interested and concerned with the progress of agriculture in Michigan.*

*We extend our sincere appreciation and thanks to ASC County and Community Committeemen and County office personnel, cooperating agencies and others who have played such an important part in the successful operation of farm programs in 1972.*

MICHIGAN STATE ASC COMMITTEE  
AND STATE EXECUTIVE DIRECTOR

*Issued April, 1973*

## ADMINISTRATION OF ASCS PROGRAMS

The Agricultural Stabilization and Conservation Service (ASCS) is the agency of the U. S. Department of Agriculture that administers specified commodity and related land use programs designed for voluntary production adjustment, resource protection, and price, market, and farm income stabilization.

Administration of these programs is accomplished through State, County and Community Committees. These committees are composed of farmers who represent various types of farming in the State. They establish the policies that are within their legal and administrative jurisdiction with respect to the operation of all applicable programs of the U. S. Department of Agriculture at the State and County level.

The Michigan State ASC Committee consists of three members appointed by the Secretary of Agriculture. In addition, the Director of Agricultural Extension Service is an ex-officio member of the committee.

The State Committee is responsible for the administration of farm programs in the State and for general supervision of the work of County Committees. The State Committee appoints a State Executive Director who supervises and directs the work of the State Office staff under policies established by the committee.

Each ASC County Committee has three farmer-members elected by farmer-elected delegates to a county convention. One committeeman is elected each year, with two committeemen being holdovers. The County Agricultural Extension Agent is an ex-officio member of the committee.

Each ASC County Committee employs a County Executive Director who, for the committee, hires the necessary employees for office and field work and sees that the day-to-day office operations are effectively performed. The County Committee, however, is responsible for programs and administrative policies and decisions at the county level.

## PART II

### RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

The Rural Environmental Assistance Program (REAP) is the successor to the Agricultural Conservation Program. It is the principal channel through which the Federal Government shares with farmers and ranchers, the cost of carrying out approved soil, water, woodland, and wildlife conservation and pollution abatement practices on their land. The program is entirely voluntary and assistance is made available for practices over and above what farmers would carry out with their own resources and on their own initiative.

REAP cost-sharing assisted farmers in Northern Michigan Resource Conservation and Development Projects to carry out and accelerate needed soil and water conservation practices in the project areas. The program also assisted farmers in accelerating and carrying out needed soil and water conservation practices in watershed areas approved under Public Law-566.

Nineteen Special Projects dealing primarily with livestock waste and the establishment and improvement of vegetative cover for livestock were approved under the program. Most of these special projects were carried out in the Upper Peninsula. Pollution abatement practices were carried out on 482 farms in 1972. It is estimated that government cost-sharing represented 20 to 25% of the total cost of these practices. In the last three years a total of 825 pollution abatement practices were carried out. This included animal waste storage and diversion facilities on 454 farms, disposal pits for solid wastes on 76 farms and measures to stabilize sediment on 295 farms.

Technical assistance for permanent type practices are provided by the Soil Conservation Service, U. S. Forest Service and others.

Activity for the past five years is listed below.

YEAR	PARTICIPATING FARMS	TOTAL GROSS EXPENDITURES
1968	25,399	\$ 5,225,082
1969	18,163	3,829,389

RESOURCE CONSERVATION AND DEVELOPMENT - 1972 REAP

Resource Conservation and Development (RC&D) projects help bring about a better place for people to live, work, and play. RC&D projects create a base not only for new jobs and higher incomes but also for outdoor recreation and beautification of the countryside.

The U. S. Department of Agriculture (USDA), by authority of the Food and Agriculture Act of 1962, gives technical and financial help to local groups in the conservation and development of the natural resources in their area. Also, it helps project sponsors seek funds and services from other Federal agencies and from State and local sources. The Soil Conservation Service (SCS) has leadership for USDA in this program.

### PART III

#### 1972 FEED GRAIN PROGRAM

The Agricultural Act of 1970 initiated a cropland set-aside approach for participating producers in the voluntary wheat, upland cotton, and feed grain programs. These programs are designed to help farmers shift to a market-oriented agriculture.

Program goals included those to give farmers more opportunity for decision making on their farms; to protect and improve farmers' income; to keep agricultural production in line with anticipated needs and to put a greater reliance on the market place as the principal source of farm income. Feed grains include corn, grain sorghum and barley, however, barley was not included in the 1971 program.

To participate in the 1972 program, a farmer agreed to set-aside from production 25% of his feed grain base acres and devote them to an approved soil conserving use. He also had to maintain his conserving base acres. He then had two alternatives. He could set-aside additional acreage up to 10% of the corn-grain sorghum base and 20% of the barley base with the option of offering an additional acreage equal to 5 or 10% of the corn-grain sorghum base.

Another alternative was to set-aside an acreage up to 10% of the corn-grain sorghum base, have the option to offer another 5% and reduce the 1972 corn-grain sorghum acreage below the 1971 corn-grain sorghum acreage by an amount equal to two times the additional set-aside.

Set-aside payments for a farm were calculated on half of the feed grain base acreage multiplied by the farm yield times the payment rate per bushel. A producer who complied with set-aside and conserving base requirements could receive payments on half of his base acreage whether he planted feed grains or not.

Listed below is a summary of participation by Michigan farmers in the Feed Grain Program for the years 1968-1972.

<u>Year</u>	<u>Participating Farms</u>	<u>Acreage Diverted</u>	<u>Payments</u>	
			<u>Diversion</u>	<u>Price Support</u>
1968	50,300	802,675	\$25,433,311	\$8,422,539
1969	54,624	883,103	27,968,888	8,979,106
1970	53,910	849,905	24,258,541	8,985,220

<u>Year</u>	<u>Participating Farms</u>	<u>Acreage Set-Aside</u>	<u>Set-Aside Payments</u>
1971	65,670	350,534	\$20,261,764
1972	62,441	660,958	34,661,418

The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

## PART IV

### 1972 WHEAT PROGRAM

The goals for this program were the same as for the 1972 Feed Grain Program also included in this report.

To participate in the 1972 program in Michigan, a farmer agreed to set-aside from production an acreage equal to 83% of his domestic allotment to qualify the farm for certificate payments.

A producer also had the opportunity to designate an additional acreage up to 75% of his domestic allotment. Under this option, a winter wheat grower had to designate land already planted to wheat. The acreage offered had to be of average quality wheat and had to be destroyed by the established disposal date.

In addition to devoting his set-aside acres to an approved soil conserving use, a participant also had to maintain his conserving base acres.

Participants in the 1972 Wheat Program could receive price support on all their wheat crop but were eligible for wheat certificate payments only on the portion included in their domestic allotment.

#### WHEAT PROGRAMS 1968 - 1972

<u>Program Year</u>	<u>Number of Participants</u>	<u>Acreage Diverted</u>	<u>Total Payments</u>
1968	42,258	1/	\$16,066,395
1969	61,575	251,618	22,350,310
1970	61,670	434,869	20,523,179

<u>Program Year</u>	<u>Number of Participants</u>	<u>Acreage Set-Aside</u>	<u>Set-Aside Payments</u>
1971	63,992	234,840	\$20,711,118
1972	60,427	256,338	16,069,571

1/ The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

## PART V

### 1972 SUGAR PROGRAM

The United States Sugar Program has a three-fold purpose: (1) to protect the welfare of those engaged in the domestic production of sugar; (2) to provide U. S. consumers with ample sugar supplies at reasonable prices; and (3) to promote and strengthen the export trade of the United States.

Payments are conditioned on the observance of acreage controls when needed, nonemployment of child labor, payment of fair wages to workers, and payment of fair prices for sugar crops purchased from other producers.

Payments to producers are financed out of the general funds of the Treasury. However, sugar taxes on all sugar marketed within the quota system provide funds which more than offset all costs of the program.

The program also gives limited benefits to growers through special conditional payments for crop deficiency or abandonment caused by natural disasters such as drought, flood, storm, freeze, disease or insects.

Activity for the years 1968-1972 is summarized below.

<u>Year</u>	<u>Number of Applications</u>	<u>Acres Planted</u>	<u>Tons of Beets Marketed</u>	<u>Cwt. Sugar Produced</u>	<u>Total Payments</u>
1968	2,375	90,946	1,708,311	4,744,920	\$3,790,202
1969	2,244	93,255	1,503,828	4,441,850	3,571,216

## PART VI

### LAND RETIREMENT PROGRAMS

These programs provide for shifting cropland presently not needed for agricultural production into conservation, recreational and open space use. Participants receive adjustment payments related to the value of crops normally produced on the land.

The Cropland Adjustment Program which included (Greenspan), authorized in 1965 was offered on only a limited scale during 1966 and 1967 with agreements entered into for periods up to 10 years. The Greenspan provision provided for more open space and other recreational opportunities for urban areas.

In 1972, 1,390 farms were enrolled in the Public Access feature of the Cropland Adjustment Program to allow hunting, hiking and fishing. This provided a total of 78,247 acres of added open space for public use. Two-thirds of these agreements were in the lower third of the State where there was the greatest demand by the public for open space.

The Public Access Program provided a great resource at the least cost of any recreational program tried heretofore. The farmer and urban people share a mutual interest in the program. Anyone may obtain a list of the farms open to the public for the above uses by contacting the State or County ASCS Office.

A summary of acreage and payments for the Cropland Adjustment Program is shown on the following pages.

PILOT PUBLIC ACCESS UNDER THE 1972 SET-ASIDE PROGRAMS

Farmers in 50 counties in 10 states across the United States were offered the opportunity in 1972 to receive payments for permitting the public to hunt, fish or hike on their land. To be eligible for a public access agreement, a farmer had to be participating in a set-aside program. The money farmers received under this Pilot Public Access Program was in addition to their regular payments for setting aside part of their crop acres. A sliding payment scale was used according to the rating of the land as game habitat.

Activity for 5 Michigan counties is shown below.

## PART VII

### COMPLIANCE AND AERIAL PHOTOGRAPHY

The Compliance and Aerial Photography Division is responsible for obtaining acreage determinations and checking compliance of farmers under various ASCS farm programs. Compliance is determined in two ways: one method is called producer certification, the other method is an on-farm inspection measurement by farm reporters.

The certification method consists of farmers visiting the county office and certifying compliance with their program intentions. Photocopies are used in certifying compliance. They are exact reproductions of aerial photo enlargements on file in the county office.

If the producer wishes to know the exact acreage of a given area he may obtain this information by requesting measurement service. This service is provided by the county ASCS office at a nominal charge.

Aerial photographs for any given area in Michigan may be purchased by the public through the State or County ASCS office.

## PART VIII

### PRICE SUPPORT PROGRAM

Price support is achieved through loans, purchases and payments for eligible commodities, all at announced levels. Legislation was designed to make some export commodities more competitive in world markets through market price support at or near world price levels. At the same time, grower's incomes are protected by supplementary price support payments, and -- in the case of wheat -- issuance of wheat marketing certificates which bring returns to participating growers to full parity on the domestically-consumed portion of the crop.

For most commodities, loans are made directly to producers on the unprocessed commodity through ASCS county offices. Smaller amounts of grains are also purchased from producers.

Loans are available for periods of six to eight months following harvest. Depending on the commodity, loans generally mature one month following the end of loan availability. Purchases from producers are made at the time of loan maturity for the crop.

Price support loans to producers are "nonrecourse." With this type of loan, producers are not obligated to make good any decline in the market price of the commodity they have put up as collateral. If market prices rise above support prices, producers can pay off their loans and market their commodity. If market prices fail to rise above support prices, producers can deliver the commodity to CCC, with appropriate adjustments for quality and quantity, and discharge their obligation in full.

Support loans and purchases give farmers a ready means of promoting more orderly marketing, particularly in periods when bountiful harvest supplies threaten to push prices of farm commodities down to unfair levels.

In recent years farmers also have been able to continue their loans on certain grains in farm storage beyond the first year, earning storage payments during the announced loan extension (reseal) period.

1971 PROGRAM YEAR

## PART IX

### EMERGENCY LIVESTOCK FEED PROGRAM 1971 - 1972

This program is designed to help maintain foundation livestock herds which might otherwise be liquidated because of a disaster which places undue financial hardship on producers.

Operation of the program is limited to those areas which have been designated emergency areas by the Secretary of Agriculture. The program may not operate in those areas, unless there is a proven need for it.

Under this program for 1971-72, eligible livestock owners could purchase CCC-owned feed grains at not less than 75% of the county loan rate for foundation herds and breeding stock. For other eligible livestock owned, at least six months' feed grain could be purchased at the following rates:

Oats and Barley - the full county loan rate.

Corn - county loan rate plus \$.06 per bushel.

Grain Sorghum - county loan rate plus \$.11 per hundredweight.

Due to severe drouth during planting time and throughout the growing season in Manistee and Newaygo counties, feed grain production was reduced to between 35% to 40% of normal. The resulting shortage of livestock feed grains increased the feeding of forage stocks and by November and December of 1971, the shortage became acute. These counties were declared disaster areas for purposes of the livestock feed program by the Secretary of Agriculture in January, 1972.

A total of 26,386 bushels of corn and 16,674 bushels of oats were sold to 74 producers who were qualified for assistance under the program. A total savings to livestock feeders was approximately \$20,407.18.

Listed on the following page is a breakdown by county of the sales of CCC-owned grain. The quantities listed under "Primary" were used for foundation herds, and the quantities listed under "Secondary" were used for other eligible livestock. Only the counties where sales were made are listed.

EMERGENCY LIVESTOCK FEED PROGRAM  
SALES OF GRAIN - 1971-1972

## PART X

### BEEKEEPER INDEMNITY PAYMENT PROGRAM

The indemnity payment program authorized under the 1970 Agricultural Act was retroactive to 1967 and will continue through December 31, 1973. To be eligible for payments, beekeepers must file applications with their County ASC Committees and must prove loss of or damage to honeybee colonies due to pesticides. A beekeeper filing for payment must satisfy the following requirements in written form:

1. Show that his own pesticide application, if any, in no way contributed to his bee losses,
2. That he took reasonable care to protect his bees if he had prior notice of pesticide use in the vicinity,
3. That he did all he could to reduce losses after the bees were exposed,
4. The loss was due entirely to the use of pesticides, and
5. Extent of damage, i.e., destroyed, severely damaged or moderately damaged.

Claims for indemnity payments could be filed on the basis of a loss of income proven by actual business records or on a flat rate basis. Rates for losses filed on a "flat rate" basis were authorized as follows:

Extent of Loss	For Losses Sustained	
	Before June 10, 1972	After June 9, 1972
Colony destroyed	\$20.00	\$15.00
Colony severely damaged	15.00	10.00
Colony moderately damaged	5.00	5.00
Queen nucleus destroyed	7.50	5.00
Queen nucleus severely damaged	5.00	no payment

## PART XI

### FARM STORAGE AND DRYING EQUIPMENT LOAN PROGRAMS

Under this program eligible farmers can obtain Commodity Credit Corporation (CCC) loans from their county ASCS offices to finance on-farm storage and drying facilities needed for grain and other commodities. Adequate on-farm storage and drying capacity enables a farmer to do a better job of utilizing his crops and lessens the possibility of his getting caught in a transportation bottleneck or in a market glut.

In general, these loans are available for up to 85% of the total cost of the facilities and are repayable in four equal installments over a period of five years at low interest rates.

## PART XII

### CCC-OWNED GRAIN STORAGE

The CCC-owned Grain Storage Program in Michigan covers the operation of 13 binsites in 10 counties. The binsites contain 1,093 silo-type and 21 quonset-type structures with a total storage capacity of 4,433,995 bushels. During 1972, all CCC-owned commodities in store in the binsites were sold. This consisted of 1,321,828 bushels of corn and 194,903 bushels of oats.

In addition, 306 silo-type structures and 3 quonset-type structures were sold in 1972. This resulted in the closing of 4 binsites.

# PART XIII

## WOOL AND MOHAIR PROGRAM

The National Wool Act of 1954, provides that support of the prices for wool and mohair may be carried out through payments to producers.

The Agricultural Act of 1970 amended the National Wool Act to establish for the three marketing years beginning January 1, 1971, and ending December 31, 1973, the support price for shorn wool at 72 cents per pound, grease basis, and the support price for mohair at 80.2 cents per pound, grease basis,

The program is designed, through use of annual payments, to support the returns to producers from wool and mohair.

The total amount of payments under the program is limited to 70 percent of the accumulated totals of duties collected on imports of wool and wool manufactures.
